SERVING ALL YOUR ACCREDITATION NEEDS

OUR CONSULTING PROCESS

At Engineered Strategies Inc. (ESI) all of our services begin with the execution of a clear, concise Consulting Agreement, written in plain English to ensure that we both understand and agree on the goals and deliverables.

ISO/ EGBC Compliant Systems

Whether you are a manufacturing or service organization seeking ISO 9001, ISO 13485, ISO 14001 and/or ISO 45001 registration, a Testing Laboratory seeking ISO 17025 accreditation, a Certification Body seeking ISO 17065 accreditation or an Engineering Firm seeking an EGBC Permit to Practice, the process is the same:

1. A **Gap Analysis** is performed to determine your current state of compliance with the relevant ISO standard. A clear, concise Gap Analysis Report is issued.
2. A **Systems Manual** (or **PPMP**) is developed which documents your current operational procedures and any additional required procedures as determined from the Gap Analysis.
3. **Training** is performed to ensure that everyone in your organization knows what they are supposed to do.
4. **Internal Auditing** is performed to confirm that everyone in your

organization is doing what they should be doing.

5. **Registration, Accreditation, or a Permit to Practice** is granted by the body of your choice.
6. **Continuous Improvement** occurs post-accreditation to help ensure that your bottom-line profitability is maximized while maintaining regulatory compliance.

Product Certification Consulting

Whether you are a Certification Body accredited to certify products for your clients or you are a manufacturer seeking Certification from a SCC, NRTL or CE Notified Body, we can meet your needs.

1. A **Gap Analysis** is performed to determine the current state of compliance of the product with the relevant CSA, UL, ANSI, IEC, standards etc.
2. A **Certification Report** is prepared suitable for presentation to the applicable Certification or Accreditation Body.
3. A **Quality Control Program** is implemented to ensure that you continue to be in a position to pass the follow-up inspections from the regulatory bodies.

Our President, Mark Havlasek, P.Eng., M.B.A. has almost 40 years of hands-on experience with regulatory/voluntary codes and standards compliance and profitability maximization.

Business Planning and Implementation

Whether you require a business plan to help obtain financing or wish to improve your business we can meet your needs.

1. An **Executive Team Interview** is performed to determine what the executive vision of your organization is.
2. A **Business Plan** is prepared suitable for presentation to financiers, investors and the Board of Directors, covering all areas including **Sales Growth, Marketing, Operations and Financial Strategies**.
3. Assistance with the **Implementation of the Business Plan** is provided to ensure that the processes are optimized for maximum profitability.

At Fees You Can Afford

We can often save you more than the cost of our service alone. So why not request a proposal today?
